Annexes:	1-

This assessment has been conducted by REMA through Department of Environmental Education and Mainstreaming (DEEM) with the support of Poverty Environment Initiative Project (PEI).

The assessment could not be realized without fruitful partnership between REMA and leading sector Ministries namely MINAGRI, MINIRENA, MIDMAR, MININFRA, MINECOFIN, MINICOM, MYICT, MoH, MINEDUC, MIGEPROF, MINALOC, MINIJUST and their respective Institutions Agencies.

We thank also all REMA staff for their contribution to the completion of this assessment.

FOREWORD

The mission of Rwanda Environment Management Authority (REMA) is to promote and ensure the protection of the environment and sustainable management of natural resources through decentralized structures of governance and seek national position to emerging global issues with a view to enhancing the well-being of the Rwandan people.

The aforementioned mission cannot be achieved if stakeholders do not integrate Environment and Climate change issues in their plans and programs. Sustainable development is largely dependent upon successful integration of environment and climate change into economic planning and decision making.

In line with the government guiding plans and strategies (Vision 2020, EDPRS2, and SSP) and Millennium Development Goals (MDGs), environment and climate change were identified as cross cutting issues. Therefore, REMA has committed to mainstream environment and Climate change into all Sector ministries plans identified in EDPRS 2 and District Development plans (DDPs).

As we go forward, it is imperative that we look back at sector achievements, key challenges and issues that require special attention. The report provided by this assessment 2013/2014 and 2014/2015 serves that purpose. The information provided covers all Sector clusters, their lead Ministries and associated institutions.

This assessment revealed that remarkable achievements have been made, even if there is still a long way to go. I hope that the recommendations made in this report will prove useful to all those concerned sectors to better plan for further achievements. It will also help them in self-monitoring and evaluating the key Env. &CC outcome indicators lagging behind in different sectors. Sector assessment will be conducted on every fiscal year basis.

I wish to express my gratitude to all the staff of REMA, to all lead Ministries and their institutions and to all other stakeholders who have contributed to the production of this assessment report.

Dr. Rose MUKANKOMEJE Director General of REMA

ACRONYMS

DDPS	: Districts Development Plans
EDPRS	: Economic Development and Poverty Reduction Strategy
EIA	: Environmental Impact Assessment
EMP	: Environmental Management Plan
ENR	: Environment and Natural Resources
Env.&CC	: Environment and Climate Change
FONERWA	: Rwanda's National Environment and Climate Change Fund
GDP	: Gross Domestic Product
HEC	: Higher Education Council
HLIs	: Higher Learning Institutions
IDP	: Integrated Development Program
LED	: Local Economic Development
LWH	: Land Husbandry, Water harvesting and Hillside irrigation
MIFOTRA	: Ministry of Public Service and Labour
MIGEPROF	: Ministry of Gender and Family Promotion
MINEDUC	: Ministry of Education
MINICOM	: Ministry of Trade and Industry
MINIJUST	: Ministry of Justice
MININFRA	: Ministry of Infrastructure
MINIRENA	: Ministry of Natural Resources
МоН	: Ministry of Ministry of Health
MYICT	: Ministry of Youth and ICT.
NAEB	: National Agricultural Export Development Board
NIRDA	: Institute of Scientific and Technological Research (IRST)
NISR	: National Institute of Statistics of Rwanda
NURC	: National Unity and Reconciliation Commission
PFM	: Public Finance Management
PSF	: Private Sector Federation
RAB	: Rwanda Agriculture Board
RDB	: Rwanda Development Board
REB	: Rwanda Education Board
REMA	: Rwanda Environment Management Authority
RGB	: Rwanda Governance Board
RNRA	: Rwanda Natural Resource Authority
RSSP	: Rural Sector Support Program
SAP	: Single Action Plan
SEA	: Strategic Environmental Impact Assessment
WDA Sector Assessn	: Workforce Development Authority

2013-2014 all Sectors 5 -
Annex 4: Compiled data on integration and implementation of key Env. CC Indicators FY 2014-2015
in all Sectors 19 -

Sustainable development is largely dependent upon successful integration of environment and climate change into economic planning and decision making. Environment and climate change mainstreaming involves establishing the links between poverty and environment including climate change and identifying plans and activities in line with environmental sustainability. The Government of Rwanda has committed to mainstream environment and climate change into national policies, plans and strategies. In that line, environment and climate change were identified as cross cutting issues in the Economic Development and Poverty Reduction Strategy II (EDPRS 2013-2018) towards achievement of the long-term Rwanda Vision 2020 and Millennium Development Goals (MDGs).

In order to implement the mandate of supervising, monitoring and ensuring that issues relating to environment are integrated in all national development programs, Rwanda Environment Management Authority (REMA) developed a check list and guidelines for mainstreaming environment and climate change issues into Sector Ministries and Districts Plans in line with EDPRS 2 and Green Growth Strategy. REMA also conducted several trainings for Sector Ministries and District's officials on environment and climate change mainstreaming.

In this context, REMA through the Department of Environmental Education and Mainstreaming conducted an assessment of integration and implementation of environment and climate change activities into the plans and programs of development sectors.

The overall purpose of this assessment is to assist Sector Ministries to enhance the integration and implementation of Env. &CC activities into their plans and reporting system, to ensure that environment and natural resources are utilized and managed sustainably in line with the EDPRS targets, MDGs and Vision 2020 aspirations.

The specific objectives are to:

- Evaluate the level of integration and implementation of environment and climate change activities in the sector annual action plans and reports for the fiscal year (2013-2014) and (2014-2015)
- Support sectors to integrate the Key Env. &CC indicators mentioned in the guidelines and checklist elaborated by REMA and shared by MINECOFIN in line with EDPRS II and Green Growth and Climate Change Resilient Strategy (GGCCRS).

This assessment report is not exhaustive but presents a summary of the progress made in 2013-2014/2014-2015 in the implementation of key environmental and climate change issues identified in key development sectors of economic, social and governance clusters. This report gives also some recommendations which could help Sectors to improve their future planning and reporting. It will also help REMA to improve the Monitoring and evaluation of Env. &CC mainstreaming in all sector clusters in the forthcoming fiscal years.

A. ECONOMIC SECTORS CLUSTER

The economic cluster covers the macro and financial sector alongside the economic sectors of Agriculture, Infrastructure (energy, water and sanitation, transport, housing and urbanization), Information Communication Technology, Private Sector Development and Youth as well as Environment and Natural Resources Management.

1.1 Agriculture sector

The agriculture sector is led by the Ministry of Agriculture and Animal Resources (MINAGRI) and its affiliated institutions namely Rwanda Agriculture Board (RAB), and National Agricultural Export Development Board (NAEB). The key service programs are Crop Intensification Program (CIP), Land Husbandry, Water harvesting and Hillside irrigation (LWH) project/Rural Sector Support Program (RSSP), One cow per poor family Program (GIRINKA), Post-Harvest Handling and Storage Task Force, Irrigation and Mechanisation Task Force, National Sericulture Centre, Agriculture and Livestock Inspection and Certification Services, Agricultural Information and Communication (CICA).

MINAGRI has a mission to initiate, develop and manage suitable programs of transformation and modernization of agriculture and livestock to ensure food security and to contribute to the national economy.

Under Vision 2020 and EDPRS II, agricultural sector remains amongst the major national economic growth pillar after service sector and industry sector. Agricultural sector contributed approximately 32.7 % of GDP in, provides 80 % of export earnings and employs about 88 % of economically active population.

The Strategic Environmental Assessment (SEA) for agriculture was developed to guide integration of environmental issues in policies, plans and programms.

1.2 Infrastructure sector

The infrastructure sector is under the Ministry of Infrastructure (MININFRA) and its affiliated institutions namely Rwanda Energy Group Limited (REG Ltd), Water and Sanitation Corporation Ltd (WASAC Ltd), Rwanda Housing Authority (RHA), Transport Development Agency (road, aviation and inland water transport).

1.3 Environment and Natural Resources sector

The Environment and Natural Resources (ENR) sector is covered by the Ministry of Natural Resources (MINIRENA). The affiliated institutions are Rwanda Environment Management Authority (REMA), Rwanda Natural Resource Authority (RNRA) and Rwanda Metrology Agency.

1.4 Private Sector Development and Youth

This sector is composed by the Private Sector Federation (PSF), Rwanda Development Board (RDB), Ministry of Trade and Industry (MINICOM) and the Ministry of Youth and ICT.

1.5 Public Finance Management

The Public Finance Management (PFM) sector is under the Ministry of Finance and Economic Planning (MINECOFIN) and its affiliated institution (National Institute of Statistics of Rwanda)

B. SOCIAL SECTOR CLUSTER

The Social Sectors Clusters covers 3 Sectors namely, Health (MoH) and Education (MINEDUC) and Social protection Sector (MINALOC and MIGEPROF)

1.6 Health Sector

The Health Sector is led by the Ministry of Health (MoH). Its affiliated institutions is Rwanda Biomedical Center (RBC). The key service programs are Maternal and Child Health Programs, Disease Control and Prevention Programs, and Health Promotion & Environmental Health programs.

The Environmental Health Program consists of a variety of interventions, such as food safety, drinking water quality surveillance, health care waste management and injection safety, hygiene inspection, hygiene behaviour change, occupational health and safety, indoor air pollution, and climate change, natural disasters and emergency environmental health intervention.

The health sector also has an influence on the enabling environment for economic and social transformation as envisioned by the EDPRS II, aiming to contribute, among others, to a reduction in the fertility rate, which will help ease the demographic pressure in the country (MoH,2015).

1.7 Education Sector

The Education Sector is led by the Ministry of Education (MINEDUC). Its affiliated institutions are Rwanda Education Board (REB), Higher Education Council (HEC), Workforce Development Authority (WDA and Higher Learning Institutions (HLI). The main programs are Pre-Primary, Primary, Lower Secondary, Upper Secondary, Girls' Education, Special Needs Education, School Sports and Culture, School Health and Environment, TVET and Higher Education.

1.8 Social Protection Sector

The social protection Sector includes Ministry of Gender and Family Promotion (MIGEPROF) and her affiliated institutions (Gender Monitoring Office, National Women Council and National Commission for Children) and Ministry of Local Government (MINALOC).

Gender equality and equity are not only a question of fundamental human rights and social justice, but are also instrumental and a precondition for environmental conservation, sustainable development and human security.

C. GOVERNANCE SECTOR CLUSTER

The Governance Sectors Clusters is composed by 2 Sectors namely Decentralisation and Justice, Reconciliation Law and Order.

1.9 Decentralisation Sector

The Decentralisation Sector Clusters is under MINALOC and Rwanda Governance Board (RGB)

1.10 Justice, Reconciliation Law and Order

The Justice, Reconciliation Law and Order is led by the Ministry of Justice (MINIJUST) and National Unity and Reconciliation Commission (NURC).

2. Key outcome indicators to be mainstreamed

As a guide to mainstreaming Environment and Climate Change (Env.&CC) into Sectors and District Plans, a checklist of key issues has been developed based on Green Growth and Climate Change Resilience Strategy (GGCCRS), EDPRS II targets, MDGs and Vision 2020 aspirations. Strategic interventions programs and outcome have been suggested, and some action/impact indicators necessary for assessing performance in mainstreaming the Env. &CC issues have been developed. The contributions of the various Sectors/institutions are identified with their roles and responsibilities assigned to them. It is expected that by taking up these roles, the various sectors will have successfully mainstreamed Env.&CC issues in their plans and programs.

In this assessment, we selected the key Env. &CC outcome indicators to evaluate the level of their integration and implementation in the planning and reporting document of the economic cluster:

Sector	Key Outcome indicators			
All sectors	Ensured that development activities carry out EIA			
	Ensured that Policies, Plans and Programs carry out SEA			
1.Agriculture	Promote Soil Conservation and Land Husbandry			
	Promoted Irrigation and Water Management			
	Promoted use of fertilizer enriched compost			
	Expanded Crop Varieties			
2.Infrastructure	Promoted development of alternative sources of renewable			
	Promoted energy efficient technologies			
	Increased access to electricity for rural industrialization and local			
	Increased access to safe drinking water			
	Increased access to basic sanitation facilities			
	Developed standards for basic housing			
	Promoted Green urbanization			
	Improved Efficiency in management of Government asset, works			
	Promoted Integrated Multi-mode Urban Transport			
3.Environment and Natural	Optimized land utilization and improved land administration			
Resources (ENR)	Integrated Approach to Planning and Sustainable Land Use			
	Rehabilitation of degraded ecosystems			
	Promoted Water security through efficiency and conservation			
	Improved Forest Management (IFM)			
	Integrated ENR concerns in local government plans and Budgets			
	Developed awareness programs for ENR promotion			
	Efficient and sustainable mineral exploration and exploitation			
	Climate Compatible Mining			
	Improved Disaster Mitigation, Preparedness			
4.Private Sector Development and	Create incentives to attract private investment in ENR			
Youth (PSDY)	Promoted Resource Efficient Industries			
	Evaluate the role of ENR in macro-economic stability			
	Create alternative income-generating activities			
	Sustainable Youth entrepreneurship supported			
	Electronic waste treatment facilities increased in public			
5.Public Finance Management (PFM)	Evaluate contribution of ENR to gross domestic product (GDP)			

Table 1: Key Env. &CC outcome indicators for Economic Sectors Cluster

Table 2: Key Env. &CC outcome indicators for Social Sectors Cluster

Sector	Ministries/Insti tutions	Key Outcome indicators		
All sectors	All ministries	Ensured that development activities carry out EIA		
All Sectors	/Institutions	Ensured that Policies, Plans and Programs carry out SEA		
	MIGEPROF	Family campaign conducted		
6.Social	Gender Monitoring	Ensured support to vulnerable Groups		
Protection	Office MINALOC	Households settlement ¹ in Imidugudu in rural areas increased		
	MINISANTE	Reduced % of women and children with respiratory diseases		
	RBC	Reduced the rate of water borne diseases (diarrhea, cholera, meningitis).		
		Reduced the Prevalence rate of malaria		
		Reduced Mother-to-Child transmission of HIV		
7.Health		Improved control and prevention of respiratory diseases for worker exposed on air pollution		
		Ensured hygiene inspection		
		Ensured hygiene behaviour change		
		Increased % of health centers, Hospitals equipped with incinerators		
		Increased use of modern contraceptives		
	MINEDUC	Greening schools conducted		
		School health clubs monitored and Evaluated		
	REB	Env. & CC issues mainstreamed in education programs		
	Workforce Development Authority (WDA)	Technical Vocational Educational and Training (TVET)/Curriculu developed		
8.Education	Higher Learning Institutions (HLIs) Higher	Coordinated Capacity Building in Climate Science		
1 Houseba	Education Council (HEC) Rwanda National Commission for UNESCO (CNRU)	Research on climate change conducted currently 92015-2016) under RHA program		

1. Households settlement¹ is currently 92015-2016) under RHA program

Table 3: Key Env. &CC Outcome indicators for Governance Sectors Cluster

Sector	Ministries/Institutio ns	Key Outcome indicators
All sectors	All Ministries/ Institutions	Ensured that development activities carry out EIA
		Ensured that Policies, Plans and Programs carry out SEA
	MINALOC	Env. & CC issues integrated in DDPs and Imihigo
9.Decentralization	RGB, Local Administrative Entities Development Agency (LODA)	Developed project proposal for each District on green and climate resilience
10.Justice, Reconciliation Law and Order (JRLO)	MINIJUST	Conflicts related to natural resources solved
	National Unity and Reconciliation Commission (NURC)	Number of Laws implementing the Organic Law of environment gazetted
		Env. & CC issues integrated in the National Itorero Commission and NURC

3. Methodology

This assessment was conducted through the following main steps:

- a) Preliminary work and literature review based on the main documents related to Env. &CC mainstreaming.
 - Development of the procedures and form for data collection concept note and invitation letter sent to different institutions to request to avail the planning documents to REMA team in charge of this assessment. The required documents included :
 - ✓ Action plan 2013-2014 and 2014-2015 (to measure the progress made in the integration of environment & climate change activities in the plans;
 - Check list for environment and climate change mainstreaming into sectors 2013-2014;
 - Annual report 2013-2014 to evaluate the sectors achievements in the implementation of environment & climate change activities in the plans 2013-2014;
 - ✓ Check list for environment and climate change mainstreaming into sectors 2014-2015.
- b) Elaboration of a template for data compilation
- c) Meeting with Sector facilitators in charge environmental mainstreaming at Sector level to explain the template and data collection process.
- d) Data collection: gathering the planning and report document and compile data sector by sector using the template. The compilation is drawn for SAP and annual reports/IMIHIGO provided by each sector
- e) Data analysis:
 - All compiled data from SAP and annual reports/IMIHIGO provided by each sector were screened sector by sector to retain key environmental indicators, baseline, targets and achievements
 - Based on Key Outcome indicator, we elaborated a summary for compiled data using MS excel and Pivot table function to facilitate analysis and comparison
 - Scoring: Each indicator was awarded from 1 to 5 score according to the level of integration and implementation. The score are described below:
 - 5: Very Good (Full integration and implementation at 90-100%)
 - **4: Good** (Sufficient integration and implementation at 70-89%);
 - 3: Sufficient (Indicators are developed but not fully implemented at 50-69),
 - 2: Poor (Indicators are not fully developed and not fully implemented at 20-49 %)
 - **1: Weak** (No indicators in place. Activities tend to be reactive, not integrated into plan and reporting system below 20%)
- f) Results and discussion :
- g) Preparation of draft report

4. Results and Discussion

4.1 Results in Economic Sectors Cluster

4.1.1 Agriculture Sector

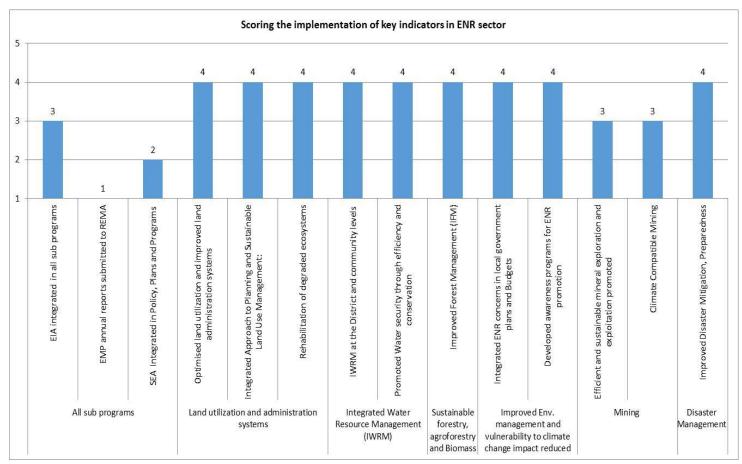

Figure 6: Ranking the achievement in the implementation of Key indicators in ENR Sector

Sector Assessment Report for Env. &CC Mainstreaming 13

4.1.4 Public Finance Management

- i. Progress made at sector level
- ✓ Effective planning coordination mechanism in disseminating EDPRS 2 cross cuttings issues mainstreaming guidelines in the planning and Budget call circular annexes ;E&CC guidelines inclusive.
- ✓ Effort is being made to advance works on inventory of natural capital accounts and valuation of ecosystem services in Rwanda and correct estimates of their contribution to environment and economy (Assistance through World Bank Technical Team)
- Environmental statistics now published annually in the NISR statistical yearbooks for evidence based decision making.
- ✓ Increased external resources mobilization targeting Environment and Natural resources sector (As per the Official Development Assistance (ODA) reports.

ii. Proposed actions to be made that will guide further improvement in mainstreaming E&CC in the financial sector:

- Undertake consultative dialogue with RRA on internal resources mobilization policies related to environment and climate change (Taxes/charges –subsidies/exemptions) and mechanism of publishing revenues collected in the RRA annual activity reports.
- Liaise with NISR on the need and relevancy of increasing environment and climate change indicators in the national accounts
- Updating/reviewing the E&CC mainstreaming guidelines on financial sector
- MINECOFIN in collaboration with MINIRENA and REMA should determine update of contribution of ENR in Rwanda economic growth and social welfare and ensure that benefit developed from ENR is captured in the national accounting system.

4.1.5 Private Sector Development and Youth

Table 7: Implementation of environment and climate change activities in PSDY Sector

No	Sub Programs	Key performance indicators	(%) Achievement 2013-2014	(%) Achievement 2014-2015	Score

4.2.1 Health Sector

No	Sub Programs	Key Outcome indicators	(%) Achievement 2013-2014	(%) Achievement 2014-2015	Score
1	All sub programs	EIA integrated in all sub programs	10	*	2
		EMP annual reports submitted to REMA	0	*	1
		SEA Integrated in Policy, Plans and Programs	0	*	0
2	Maternal and Child Health	Maternal and child health improved	75	*	3
		Increased the % of women using modern contraceptive method	95	*	4
З	Disease Control and Prevention	Reduced the rate of water borne diseases (diarrhea, cholera, meningitis).	60	*	3
		Reduced the Prevalence rate of malaria	70	*	4
		Reduced Mother-to- Child transmission of HIV	75	*	3
4	Health Promotion & Environmental Health	Improved control and prevention of respiratory diseases for worker exposed on air pollution	50	*	4
		Ensured hygiene inspection	40	*	2
		Ensured hygiene behavior change	60	*	4
		Increased % of health centers, Hospitals equipped with incinerators	50	*	4
		Increased use of modern contraceptives	60	*	3
		Increased deliveries in Heath facilities (DHs, RHs)	90	*	4

Table 8: Implementation of environment and climate change activities in Health Sector

*No available data for 2014-2015

The picture 8 shows the scoring of sector's achievement in the implementation of Key indicators in health sector

Figure 8: Score for the implementation of key outcome indicators in Health Sector

The figure 8 shows a weak score on indicators related to EIA, EMP and SEA implementation (There are related to Environmental assessment, there are no indicators in place. Activities tend to be reactive but not integrated into plan and reporting system. The indicators on hygiene inspection are not fully developed and fully implemented.

- 5: Very Good (Full integration and implementation at 90-100%)
- 4: Good (Sufficient integration and implementation at 70-89%);
- 3: Sufficient (Indicators are developed but not fully implemented at 50-69),
- 2: Poor (Indicators are not fully developed and not fully implemented at 20-49 %)
- 1: Weak (No indicators in place. Activities tend to be reactive, not integrated into plan and reporting system below 20%)

4.2.2 Education Sector

No	Sub Programs	Key Outcome indicators	(%) Achievement 2013-2014	(%) Achievement 2014-2015	Score
1	All sub programs	EIA integrated in all sub programs	20	20	2
		EMP annual reports submitted to REMA	0	0	1
2	Pre-Primary, Primary, Lower Secondary, Upper Secondary Education	Greening schools conducted	60	60	3
3	School Health and Environment	School health clubs monitored and Evaluated	69	70	3
4	Technical vocational educational and training (TVET) and Higher Education (HLIs)	TVET and HLIs Curriculum developed	90	90	4
		Research on climate change conducted	80	85	4
		Env. &CC mainstreamed in education programs	49	75	3

Table 9: Implementation of environment and climate change activities in Education Sector

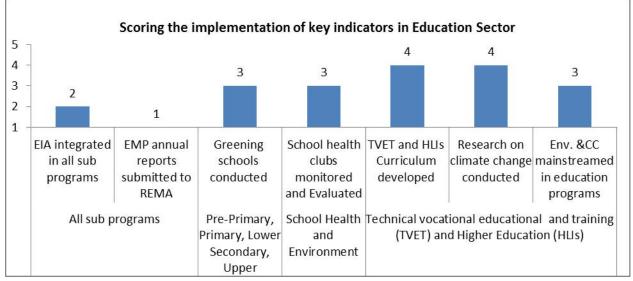

Figure 9: Score for the implementation of key outcome indicators in Education Sector

Figure 9 shows that the greening schools and environmental mainstreaming in Education Sector activities tend to be reactive but not integrated into plan and reporting system. The indicators on EIA are not fully developed and fully implemented.

4.2.3 Social Protection Sector

No	Sub Programs	Key Outcome indicators	(%) Achievement 2013-2014	(%) Achievement 2014-2015	Score
1	All sub programs	EIA integrated in all sub programs	20	20	2
		EMP annual reports submitted to REMA	0	0	1
2.	Family wellbeing	Family campaign conducted	60	70	3
		Improved Targeting and Effectiveness of Social Protection Interventions	70	75	4
		Ensured support to vulnerable Groups	70	75	4
3	Women empowerment	Women's organizations empowered on Env. & CC issues	20	20	2

Table 10: Implementation of environment and climate change activities in Education Sector

Figure 10 shows that the EIA implementation and the capacity building of women in Env. &Cc issue were not fully developed and fully implemented.

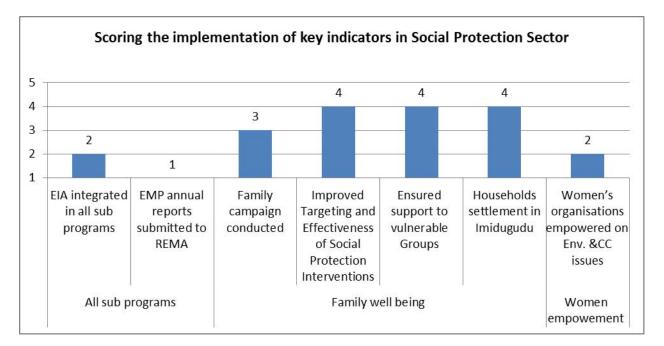

Figure 10: Score for the implementation of key outcome indicators in Education Sector

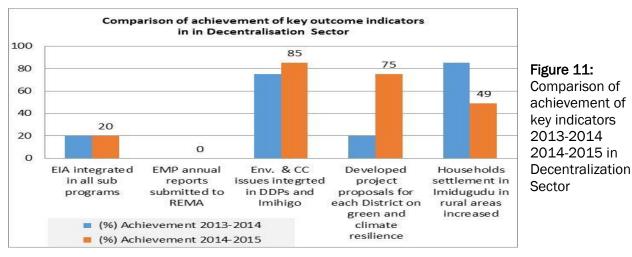

4.3 Results in Governance Sectors Cluster

4.3.1 Decentralisation Sector

Sub Programs	Key Outcome indicators	(%) Achievement 2013-2014	(%) Achievement 2014-2015	Score
All sub programs	EIA integrated in all sub programs	20	20	2
	EMP annual reports submitted to REMA	0	0	1
Implementation of DDPs	Env. & CC issues integrated in DDPs and Imihigo	81	85	4
	Developed project proposals for each District on green and climate resilience	20	75	4
	Households settlement in Imidugudu in rural areas increased	85	49	3

Table 11: Implementation of environment and climate change activities in Decentralisation Sector

Figure 11-12 shows an increase of integration and implementation of Env. &CC issues in Decentralisation Sector FY 2013/2014 and 2014/2015. However the indicators on household settlement were not planned 2014/2015.

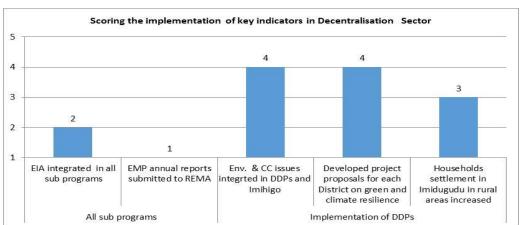

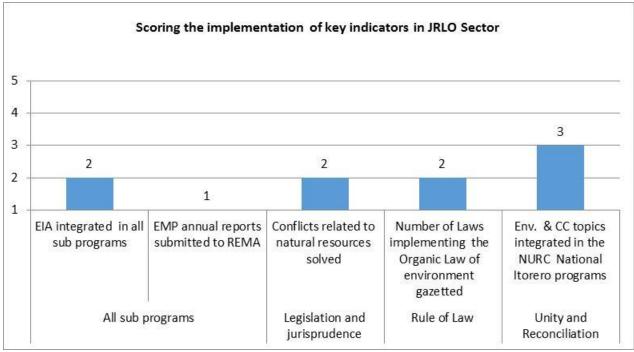

Figure 12: Score for the implementation of key outcome indicators in Decentralisation Sector

Sector Assessment Report for Env. &CC Mainstreaming 20

4.3.2 Justice, Reconciliation Law and Order Sector

No	Sub Programs	Key Outcome indicators	(%) Achievement 2013-2014	(%) Achievement 2014-2015	Score
1	All sub programs	EIA integrated in all sub programs	20	20	2
		EMP annual reports submitted to REMA	0	0	1
2	Legislation and jurisprudence	Conflicts related to natural resources solved	20	20	2
3	Rule of Law	Number of Laws implementing the Organic Law of environment gazetted	60	65	2
4	Unity and Reconciliation	Env. & CC topics integrated in the NURC National Itorero programs	50	60	3

Table 12: Implementation of environment and climate change activities in JRLO Sector

The figure 13 shows that the integration of Env. &CC issues in JRLO sector is still on low level. The indicators were not fully developed and implemented.

- 5: Very Good (Full integration and implementation at 90-100%)
- 4: Good (Sufficient integration and implementation at 70-89%);
- 3: Sufficient (Indicators are developed but not fully implemented at 50-69),
- 2: Poor (Indicators are not fully developed and not fully implemented at 20-49 %)
- **1: Weak** (No indicators in place. Activities tend to be reactive, not integrated into plan and reporting system below 20%)

4.2 Discussion

In general, the comparison of 2013/2014 and 2014/2015 shows an increased integration and implementation of key Env. & CC issues in sectors planning. New outcomes, programs and projects on Env. &CC were also initiated in the FY 2014-2015; for instance in MINEDUC with Climate Observatory Project, in MINALOC with Greening DDPs program.

However, there is a decrease in infrastructure sector. Some indicators related to the development of alternative sources of renewable energy, Water security through efficiency and conservation, Efficiency in management of Government asset and works space, the mentioned in the SAP FY 2014-2015 were not reported in the annual report, and we don't know if these indicators were implemented or not. Probably this was due to restructuration of EWSA into WASAC and REG.

In some Programs and Sub programs, the development indicators did not effectively address the Env.& CC issues. The activities tend to be reactive but not integrated into plan and reporting system. The following table give an example of some indicators and the way we suggest for their formulation.

Sector	Indicators as developed by the	Missing Env. &CC Issue					
	sector						
A.Economic Sectors Cluster

		Number of trained individuals on environmental health prevention % of health centers, Hospitals
		equipped with incinerators % of environmental related respiratory diseases reduced for workers exposed on air pollution

Sector	Indicators as developed by the sector	Missing Env. &CC Issue
7.Education Sector (MINEDUC, REB, WDA, HLIs, HEC)	Number of Early Childhood Development Center (ECD) established	Number of greened Early Childhood Development Center (ECD) established
		Number of new classrooms for 12 YBE established with EIA study
	Number of teachers trained on	Number of greened schools Number of teachers trained on
	HIV/AIDS, sexual reproductive Health and Nutrition	HIV/AIDS, sexual reproductive Health, environment and Climate change, and Nutrition
	School health and hygiene education programme implemented in schools	<i>Number of</i> School health and hygiene education programme implemented in schools
		School health clubs monitored and Evaluated
	Number of new TVET schools constructed	Number of new TVET schools constructed <i>with EIA study</i>
	Number of curricula developed for TVET	Number of programs by TVET having mainstreamed environment and climate change issues.
		Number of programs by HLIs having mainstreamed environment and climate change issues.
		No of academic papers on CC and disease prevalence
8.Social Protection Sector (MIGEPROF, Gender Monitoring Office, National Women's Council, MINALOC)	 Umugoroba w'Ababyeyi is institutionalised and coordinated in all 30 districts. Noza Imibanire n'uwomwashakanye training conducted in 30 districts 	Number of Women's organisations trained on Env. &CC issues
	C. Governance Sectors (Cluster
9. Decentralisation (MINALOC, RGB)	% of Household living in grouped settlement	% of households relocated from high risk zones
	Number of Districts having revised DDPs	Number of Env. & CC issues for each District integrated in DDPs and Imihigo
		Number of project proposal for each District on green and climate resilience

Sector	Indicators as developed by the sector	Missing Env. &CC Issue
10.Justice, Reconciliation Law and Order	Number of cases handled by Abunzi % change in cases entering courts	% of case conflicts related to natural resources solved
	N° of laws drafted for harmonization purposes	Number of laws implementing the organic law of environment gazetted
	N° of human Rights Instruments reported on	
		Number of Env. & CC topics integrated in the NURC National ITORERO programs

The table 6 shows the gaps identified in the SAP and Annual reports of different sectors and propose some Env. &CC related outcome indicators to be added in each Sector's planning.

Amongst the key finding of the sector assessment, we can highlight that:

- ✓ Some indicators mentioned in the Single Action plan (SAP) were omitted in the annual reports. Some baselines in the SAP are also different from annual report baselines
- ✓ In many figures of scoring the implementation, some key Env. & CC outcome indicators with low score (20-49%) were due to lack of planning and reporting. The concerned indicators were not fully developed and not fully implemented
- ✓ The measuring methodology (%, number,) for some indictors were not mentioned.
- ✓ The ENR/REMA report lack sufficient statistical reports and contribution from different sub-sectors, Districts and civil societies.
- ✓ Any development sector did not report on the implementation of Environmental Management plan (EMP) while in EIA certification conditions of approval, Project developer is required:
 - a. To Ensure that the Environmental Management Plan is implemented as prescribed in the Environmental Impact Assessment Report and ensure that records are kept for future monitoring or environmental audits.
 - b. To carry out regular environmental audits (which frequency may differ depending on the project type) and submit Audit Reports to the Authority.
- REMA did not also plan for a clear mechanism for monitoring and reporting on EMP implementation. The indicators formulated for inspections and auditing for EIA implementation does not refer to the % of on-going projects.

- ✓ SEA is still new in Rwanda and it was not mentioned in any SAP documents 2013-2014. Some major policies and plans such as Kigali master plan, National Land Use plan, did not also integrate SEA in their feasibility studies.
- ✓ In RDB planning and reporting, REMA role was not mentioned in the implementation of EIA. (Ex. REMA was not mentioned in anywhere in RDB stakeholders in SAP 2014-2015).
- ✓ In education sector many progress were made in 2014/2015 with the integration of Env. &CC into TVET and HLIs programs. However, Environment and climate change was not fully mentioned in the key areas of National School Health Strategic Plan 2013-2014 2017-2018 (MINEDUC, 2014)
- ✓ MINEDUC in collaboration with MoH established the School Health and Environment Clubs (MINEDUC, 2013), which replaced anti-SIDA clubs. The existing Schools environmental clubs (initiated and supported by REMA in the implementation of greening schools projects) were also replace by the School Health and Environment Clubs. REMA should liaise with MINEDUC to see how the existing Schools Environmental clubs were integrated in the School Health and Environment Program As REMA is organising the handing over of greening schools projects to MINEDUC,
- ✓ In social protection Sector, the Env. &CC related issues were not fully integrated in the planning and reporting of MIGEPROF whereas in terms of the environment and CC adaption/mitigation, women play distinct roles in managing plants and animals in forests, dry lands, wetlands and agriculture; in collecting water, fuel and fodder for domestic use and income generation; and in overseeing land and water resources (UNEP, 2002).
- Decentralization sector recorded good progress in 2014/2015 in integration of Env. &CC issues into DDPs by with greening DDPs program and supporting CSOs and District to elaborate CC mitigation projects to FONERWA. The indicators on household's settlement in Imidugudu were not developed in 2014/2015
- ✓ The National Police (NP) and Rwanda Defence Force (RDF) are cross-cutting institutions. Thus they were not mentioned in any sector Ministry mentioned in EDPRS II. However they big contribution in integration and implementation of Env. &CC activities cannot be forgotten. Recently, the NP launched a special Unity in charge of environmental crimes.

5. Conclusion and suggestions

Assessment of Integration and Implementation of Environment and Climate Change Activities into Development Sectors Plans and Programs is an important monitoring and evaluation tool to guide REMA in determining if sectors are effectively integrating Env. &CC issues in their plans and programs.

The results of this assessment show that strong progress has been made in the integration and implementation of Env. & CC issues. On average more than 75 % of key Env. &CC performance indicators were fully met or exceeded in economic sectors cluster, 70 % in Governance sectors cluster and 68 % in Social Sector cluster.

This assessment revealed a gradual increase in planning and implementation of Env. &CC issues in different development sectors in comparison of 2013/2014 and 2014/2015. The improvement can be justified that in 2013/2014 most of Env. &CC related indicators were not fully developed, activities tend to be reactive but not integrated into plan and reporting , while in 2014/2015 Env.&CC related indicators increased and some specific Env.&CC related programs/projects were initiated in some sectors especially in agriculture and education sectors.

Obviously, the assessment indicates that EIA and SEA integration, implementation and monitoring are still on low lever in all sector clusters. In most of Sectors, there are no EIA indicators in place. Activities tend to be reactive but not integrated into plan and reporting system. Any sector ministry did not submit a report on EMP implementation.

Nevertheless, REMA did not also plan for a clear mechanism for monitoring and reporting on EMP implementation.

In order to improve the mainstreaming of Env. & CC issues in sectors planning and reporting, we suggest the following:

- 1. To establish a continuous a monitoring and evaluation mechanism for key Env. & CC issues in Sector ministries
- 2. REMA should develop monitoring and evaluation indicators that can guide other sectors in determining whether they are effectively integrating key Env. & CC issues in their plans and programs
- 3. MINAGRI in collaboration with MINIRENA/RNRA and REMA should develop indicators measuring soil erosion control which will be key to monitor the effectiveness and impact of soil erosion control measures.
- MINAGRI in collaboration with MINIRENA/RNRA and REMA should develop a system for monitoring surface and ground water quality that include total suspended solids (TSS), total suspended solids (TSS), turbidity to check the pesticide and fertilizer residues.
- 5. The Millennium Ecosystem Assessment stresses that the overall goal of development should be to enhance the well-being of people. Therefore, MIGEPROF should conduct a study on the consequences of development and ecosystem change for human well-being in Rwanda.

- 6. REMA should strengthen the EIA certificate delivery by RDB and put more pressure for compliance on developers.
- 7. REMA should request RDB to use the generic format of EIA certificate guiding developers on the frequency to carry out regular environmental audits.
- 8. REMA should developers to implement EMP as prescribed in the EIA report and submit Audit Reports to the Authority.
- 9. REMA in partnership with NISR should conduct periodically the environmental survey.
- 10.REMA should increase the training and awareness on Strategic Environment Assessment and on Checklist for mainstreaming Environment and Climate change into Sector plans and programs every financial year.
- 11. The ENR sector/REMA should enrich her report with statistical reports and contribution from different sub-sectors, Districts and civil societies.
- 12. In Rwanda Governance Scorecard (RGB, 2014), the sub indicator on environmental protection was ranked on the 3rd place with 95%. Therefore, REMA should conduct a quality assessment (a study to look at how the recipient institutions and community appreciate the services they receive from REMA).
- 13.Concerning the indicator formulation, the definition of indicator should be agreed upon by all sectors during the planning process.
- 14. The future assessment should be based also Sector Performance Report approved by stakeholders in Joint Sector Review highlighting a summary of key sector achievements, key challenges, key recommendation and information on budget execution.

The Permanent Secretary/MINISANTE The Permanent Secretary/MINECOFIN The Permanent Secretary/MINIJUST The Permanent Secretary/MINALOC The Permanent Secretary/MINEDUC The Permanent Secretary/MINEPROF The Permanent Secretary/MININFRA The Permanent Secretary/MININFRA The Permanent Secretary/MINIRENA The Permanent Secretary/MINIRENA

Dear Madam/Sir,

<u>Re</u>: Assessment of integration and implementation of environment and climate change activities into Sector-Ministries Plans and Programs.

The Government of Rwanda has committed to mainstream environment and climate change into national policies, plans and strategies. In order to implement her mandate of supervising, monitoring and ensuring that issues relating to environment are integrated in all national development programs, Rwanda Environment Management Authority (REMA) developed a checklist for environment and climate change mainstreaming into Sectors and District Development Plans (DDPs) in line with EDPRS II and Green Growth Strategy. REMA developed also guidelines for Strategic Environment Assessment (SEA) in Rwanda for Policies, Plans and Programs.

In this context, REMA has organised an assessment of integration and implementation of environment and climate change activities into Sector-Ministries Plans and Programs during the fiscal year 2013-2014 and 2014-2015. The aim of this assessment is to evaluate the implementation level of environment and climate change activities in your Sector Plans 2013-2014 and to assess progress/achievements of the integration of environment and climate change activities in the plans 2014-2015.

Therefore, I take this opportunity to request you to allow your Director of planning to avail your planning documents (annual report for 2013-2014 and 2014-2015 implementation status) to REMA team in charge of this assessment.

- 2 -

Attached, please find also the concept note for the assessment. For further details, please contact: Mr Theogene NGABOYAMAHINA on Email: <u>tngabo@rema.gov.rw</u> or Telephone number 0788 567 158.

We look forward to your usual cooperation.

Sincerely,

Gu

Dr. Rose MUKANKOMEJE Director General of REMA
